

Hornet Families-

Please remember to report any Covid-related health information for your students whether they be remote or in-person, by contacting their school nurse or using the online reporting tool found on our website.

We also wanted to remind you that students who have been experiencing symptoms for at least two days can be rapid-tested for Covid-19 at their school. If you have symptomatic students in multiple buildings, all can be tested at one location. We ask you contact the school nurse to set up a time for a test. We receive the results within 15 minutes.
